

WIF's Future Focus:

Ståle Johnsen, Snr Material & Well Integrity Engineer, Total EP NORGE AS

WIF's Focus areas up to now I

- WIF's input to OLF recommended guideline for well integrity - 117.
 - Well Integrity Training
 - Well Handover Documentation
 - Well Barrier Schematics for the operational phase
 - Well Integrity Categorization
 - Well Integrity Management System
 - Sustained Casing Pressure (not released on OLF website yet)
- Work have been done in close cooperation with PSA.

WIF's Focus areas up to now II

- Sharing of well integrity cases between companies.
- Close cooperation's with the PSA to improve the RNNP (risk level in the Norwegian petroleum activity) reporting format and also to share the reported experiences between companies.
- Discuss regulatory requirements and how to interpret national and /international standards.
- Arrange Well Integrity Workshops to present WIF work and increase focus and awareness of well Integrity by use of actual cases and exercises.
- Share experiences between companies on use of new technology to improve well integrity.
- Include life cycle considerations in well design.

Possible future focus areas for WIF

- What do you see as the main challenges when it comes to well integrity for wells in operation?
 - Why do well barriers fail? What can be done to prevent this?
 - Which well integrity issues cause repeated discussions in daily work?
 - Is the training of people good enough? Is it the practical experience or the theoretical knowledge that is missing or that is not good enough?
 - Do we have the software tools to manage well integrity? Management tools, leak rate calculations, quantification of risk.....etc?
 - Do we know why barriers fails? Are we using our experience correctly or are we repeating our mistakes?
 - Can the PSA rules & regulations be improved? How?
 - Do we have the standards we need? How can we improve?
- Based on the above and discussions around the table: **What do you see as WIF's future focus areas ?**
